Two costs:

- Trying to explain your vision with unadapted tools.
- Final result not matching architect vision or client expectations.

“The mean direct and indirect costs for design errors were revealed to be 6.85 and 7.36% of contract value, respectively.”

Control tool for the architect

Communication tool for the clients

And much more...

Virtual reality at the service of architecture

A very big market growing fast:

“The global (construction) market is forecast to grow 85% to \$17.5 trillion (...) by 2030.”

“UK to spend US\$6.2 trillion on construction cumulatively by 2030”

The background features a large, faint logo for 'teagid'. The letters 'teagi' are in a light grey color, and the final 'd' is in a light orange color.

Thank you
